ANCHORINC.COM

The Anchor 5-Star Solid Safety Pool Cover delivers maximum protection, durability and pool safety. Made from premium 14-ounce vinyl-coated fabric, not laminated vinyl, the material bonds vinyl deep into the fabric scrim for longer-lasting performance against sun, rain, snow, ice and debris. Exclusive 360-degree tensioning technology creates a smooth, tight fit across the pool surface, while RF-welded construction increases strength by eliminating common stress points. The solid design blocks 100% of UV rays, helps keep pools cleaner and resists mold and mildew when properly cared for. The cover is manufactured to meet ASTM F1346-23 safety standards and backed by a limited 10-year warranty.
